Environmental Policy

Purpose

This policy has been developed to promote our dedication to the environment. **Recycling** is at the heart of everything that we do. Conserving our environment and valuable materials has never been more important or more in the public focus than now. At MR Services we are proud to be able to **recycle over 90%** of all our clients' waste material.

Policy

M R Services are conscious of our social responsibilities with regards to helping the environment through our working practices. Our objective is not only to sustain our environment for our descendants but also to rehabilitate the damage previously done. We believe that our corporate responsibility goes beyond our proprietary borders and therefore every effort will be made to conserve resources throughout our operations.

We are committed to leading the industry in having an overall positive impact on the environment. By maximising efficient use of resources through recycling we are dedicated to minimising the impact of our activities on the environment.

We will try to not only meet existing environmental laws and regulations, but will endeavour to exceed them and implement policies and procedures that position us ahead of our competition.

Growth of our company depends on our ability to minimise or eliminate our impact on our surroundings. Our company's future and the future of our environment are interconnected.

Awareness and Commitment

Our policy towards the environment will be readily available on our website. We will endeavour to ensure that staff, customers and suppliers are familiar with and implement our environmental commitment and objectives.

Practical Implementation

- Minimise waste by evaluating operations and ensuring efficiency in all aspects of our business.
- Ensure environmental issues are considered in the introduction of new processes, services or facilities.
- Minimise toxic emissions through the selection and use of our fleet and the source of our power requirements.
- Ensure the monitoring, measures and controls for environmental incidents and emergencies are in place
- Provide support, information and training to company staff with respect to environmental issues and the environmental impact of their activities.
- Actively promote recycling both internally and amongst our customers and suppliers.
- To reduce and where practical prevent pollution of every kind.
- Promote the economical use of resources and where practical purchase environmentally responsible goods and services from like-minded companies
- Review this policy periodically to ensure that it evolves with the company's activities and legislation.
